

How to determine which Brine Tank

The type of Brine Tank you choose would be based on a personal preference as to which shape tank appeals most to you.

The Smaller 11" x 11" x 36" Square Brine Tank can be used on 32K Softeners only, as they will hold enough Brine Water for this small size Softener to regenerate properly.

The Larger 18" x 40" Round Brine Tank would be used on the larger 80K Softeners only, as they will hold extra Salt for this size Softener.
